

# ASHISH BHAKHAND

+91-7014585522 | reachbhakhand@gmail.com | [LinkedIn](#) | [GitHub](#)

Senior Flutter Developer with 5+ years of experience shipping cross-platform apps used by 50K+ users. Track record of driving 15x user growth through high-impact features, establishing engineering foundations as a founding senior developer, and leading small teams to deliver production apps across Android, iOS, and Web. Creator of open-source developer tooling adopted by multiple teams.

## TECHNICAL SKILLS

**Core:** Flutter, Dart, Swift, SwiftUI, Firebase, CI/CD (GitHub Actions, Fastlane)

**Also:** TypeScript, React.js, Next.js, Node.js, Python | PostgreSQL, MongoDB, AWS (EC2, S3, Lambda, Cognito)

## EXPERIENCE

**Senior Front-end Developer** | *Quantum Coherence Technologies*

Mar 2023 – Present

*Building cross-platform wellness apps (BuddhaCEO, Besupermind) + admin console | Flutter, AWS, Firebase*

- **Joined as the first senior engineer;** shipped a production-ready mobile + web app within 3 months, establishing the engineering foundation for the company.
- **Scaled to 50K+ users and 4.7★ app store ratings** across two apps deployed on Android, iOS, and Web, lead and mentored team of 2 developers + interns.
- **Built high-performance audio/video streaming players** forming the core of the product experience; integrated real-time video calls, analytics, and engagement tools.
- **Achieved <24-hour bug turnaround** by fully applying DDD and SOLID principles, enabling bi-weekly release cycles with minimal regressions.
- **Established CI/CD pipelines** (GitHub Actions, Fastlane) for automated testing and multi-environment deployments; contributed backend APIs and serverless functions.
- **Mentored 2 developers and interns,** enforced code quality through PR reviews, and built reusable component libraries adopted across all products.

**Flutter Developer** | *Yoro (News Without Noise)*

Dec 2021 – Mar 2023

*News app with social features | Flutter, Clean Architecture, TDD*

- **Contributed to growing the app from 10K to 150K+ downloads** and from 4K to 35K+ MAU within 6 months by shipping interactive story creation, infinite-scroll feeds, and social features.
- **Achieved 60% user retention and 7–9K DAU** by iterating on features with beta users and optimizing the core news experience.
- **Audited and refactored the entire codebase;** introduced clean architecture, reducing build times by ~30%, cutting app size by 12MB, and enabling 2-day self-serve onboarding for new developers.
- **Introduced automated testing (unit, widget, integration)** with TDD/DDD practices, significantly reducing regression bugs.
- **Led a small engineering team** — distributed tasks, reviewed PRs, and mentored teammates through technical challenges.

**Freelance Flutter Developer** | *Self-Employed*

Mar 2019 – Nov 2021

- **Delivered 15+ end-to-end client applications,** evolving from bug-fixing to full-cycle product development across diverse domains.
- **Built complex multi-app systems:** a gym management platform (user app + gym app + admin console) and a food delivery platform (customer + restaurant + driver apps) with shared codebase architecture.
- **Implemented real-time features** with WebSockets, maps, push notifications, and Firebase Cloud Functions; defined architectural patterns (MVC, MVVM, layered) across all projects.

## OPEN SOURCE

**Fabrik Toolkit** | *fabriktool.com - Creator & Maintainer*

- **Built an open-source package ecosystem** (6 packages, 300+ downloads) that scaffolds production-ready features and enforces consistent architecture, saving teams 2–3 days of setup per project.
- **Adopted by multiple engineering teams** to standardize project setup, accelerate onboarding, and reduce boilerplate across Flutter projects.

## EDUCATION

**B.Tech in Electronics and Communications Engineering**

2016 – 2020

Rajasthan Technical University
